The linear park is characterized by 5 lines of trees, all aligned to emphasize the boulevard structure. This first part of the project is characterized by the boulevard of trees, by the tram line, by the bicycle path, very wide, that is a connection between the Cubic House, a symbol of the city hall and the Windmill, an symbol of the project area centre and the residential area centre. The trees on the right part of the boulevard are already existent in the area, but the trees on the left part are new, because of the sick-tree that are now there, and that can’t grow in a good way on that soil.
