Building Composition:
The buildings aligned with the existing city grid and connects with each other through a Platform which becomes a Plaza.

The programmatic configuration of each building corresponds to different Public functions and also Office Spaces.

The concept involves the building as a part of the park and creates a public flow continuously.

The buildings also creates an identity of the site and at the same time as a part of the Master-plan.

Diagrammatic Representation of Functions

Legend:
- Commercial Shops
- Basement Level (Parking)
- Access Area (Lift/ Staircase)
- Common Spaces (Lobby/ Atrium)
