

Existing Point and Linear Elements on the Site and Surroundings

Rationale for Choosing the Site

Mantova

The reason for choosing Mantova as the project area is the interesting morphological scenes that emerged and changed as a result of the interrelationship of its natural structure and historical background. Today, it still offers a multi-layered substrate by containing its natural, historical and morphological traces.

The Site

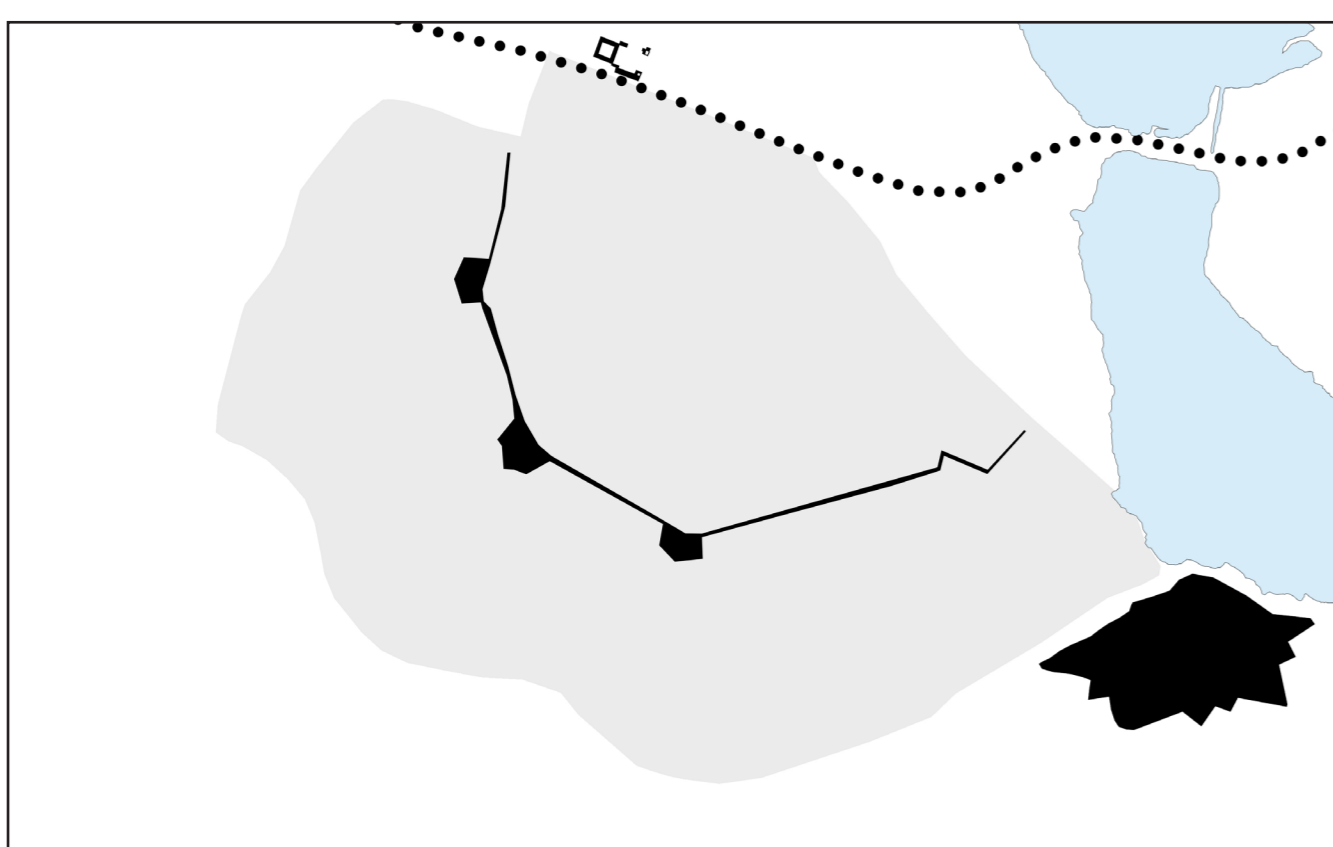

The reason for choosing this area as a site is that it is in a position to meet the growth need of the city in line with the criteria of urban age and that it will provide an interesting base for the natural and historical elements it has and the way their traces treat the area.

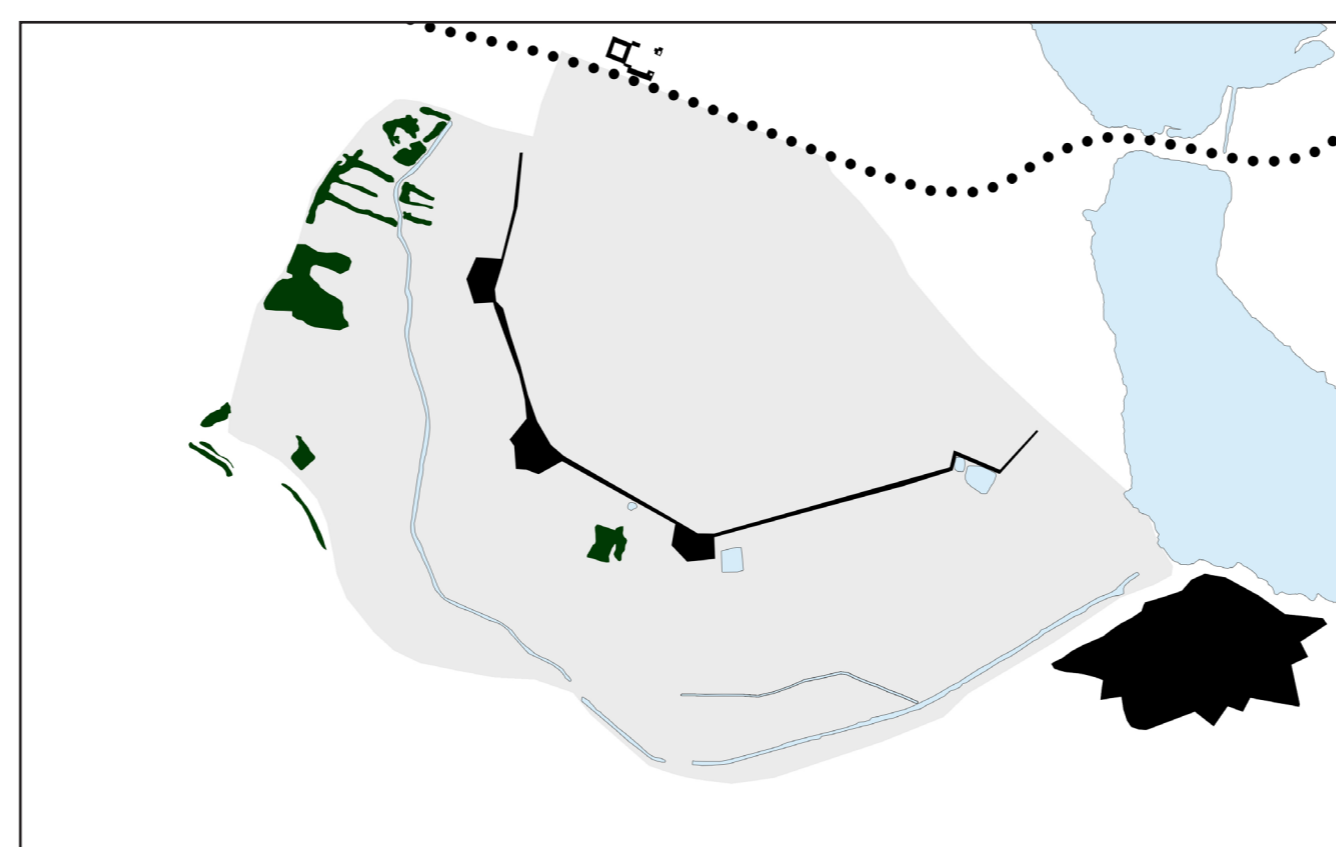

Matching Traces: Existing situation matched with 19th century map

Mantova and Surroundings: Austrian State Archive, 19th Century

Palazzo Te, Railway as a New Border, City Walls and Pietole area

+ Canals, Lakes and Trees

+ Roads and Field Lines-Paths
