

CONCEPT & STRATEGIES

Bringing back the lost connection of Piacenza city to the nature from the urban fabric in city center towards Po River.

PARCO MAGGIORE DI PIACENZA

Revising the transportation network

- Taking the railway underground
- Removing the unnecessary roads/transforming them to avenues by adding sidewalks/bikelanes and greenery to reduce the speed
- Transforming the streets to pedestrian oriented streets/ extending the ZTL zone

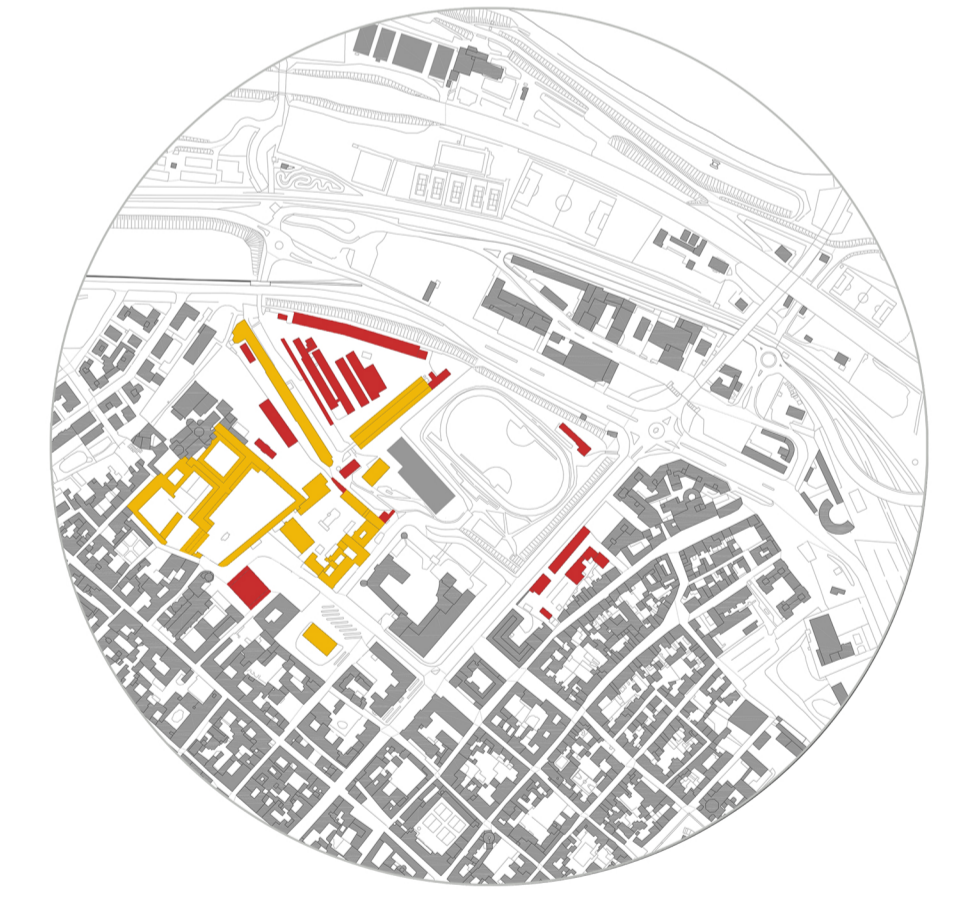

Providing safe pedestrian accessibility

- Developing safe pedestrian pathways from the site towards the river
- Transforming the streets & Piazzas to pedestrian oriented areas with limited car accessibility

Restoration & transformation of existing buildings & assets

- Buildings to be restored and used for new functions such as university, market & cultural center
- Buildings in bad quality to be removed

Organizing & connecting the green areas together
