#### New City Texture

After the city walls were tear down, the city expanded outward. The road system adopted a 120-meter square grid, and the intersections of the streets were cut corners. Each block grows a different internal shape under the octagonal frame.

#### **Industrial Texture**

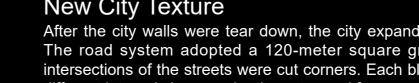

With the urban expansion of Barcelona and the growth of immigration, the chaotic industrial buildings built in the suburbs in the early years are gradually surrounded by new residential areas. The urban space in the east of the city needs to be improved, but this history needs to be remembered.

# **Old City Texture**

The growth of manufacturing makes urban buildings denser. But There are open areas reserved for the construction of squares, markets and new buildings, which constitute the public space system of the old city.

## Old Village Texture The excessive concentration of factories led industrial interests to move out toward the towns along the plain. Viiages and towns were built outside the city walls. Their texture is more regulare than the crowded old city.

SKYLINE OF BARCELONA

#### **URBAN VOID SPACES**

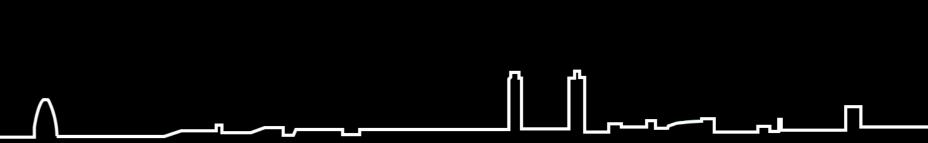

SMALL: PLACA DEL PI

MEDIUM: PLACA DELS ANGELS

LARGE: ARC DE TRIOMF

X-LARGE: PLACA DE CATALUNYA

FACE THE SEA

Place del Pi is a hidden square that hosts art fair, a market that sells lacal products, like lacal dry-cured sausages, cheeses, etc. There is a church named Santa Maria del Pi around Placa del Pi that was constructed during the 14th century. The front facade has an beautiful large rose window. Additionally, the square is surrounded by traditional shops with old decorated facades and old bars and restraurants.

Placa dels angels is mainly defined by a modern buildings, Museum of Contemporary art, that is designed by Richard Meier in 1995. The square is full of skater boys and girls, except the visitors for the white building, everyday.

Arc de triomf, with classical architectural style and proportions, was built in 1888 for Barcelona World Fair. It is, now, also the gateway to a wonderful open area where people can walk down to the avenue with rows of palm trees and beautiful street lights. The area si also full of skaters and street artists.

Placa de Catalunya is the meeting center of Barcelona for locals and visitors with its large shopping centers and department stores around. Most of the city's most important streets and avenues meet at Placa de Catalunya. It is known for its big square, fountains, and statues, with a great number of pigneons gathered in the area.

FROM PROJECT SITE

Size: 0.0007 sqkm Uses: Marketing, art fair outside seating

Size: 0.005 sqkm Uses: Gathering, skating field Size: 0.03 sqkm Uses: Visiting, wondering playing

Size: 0.05 sqkm Uses: Gathering, underground trasportation system
