

SYSTEM OF BUILT

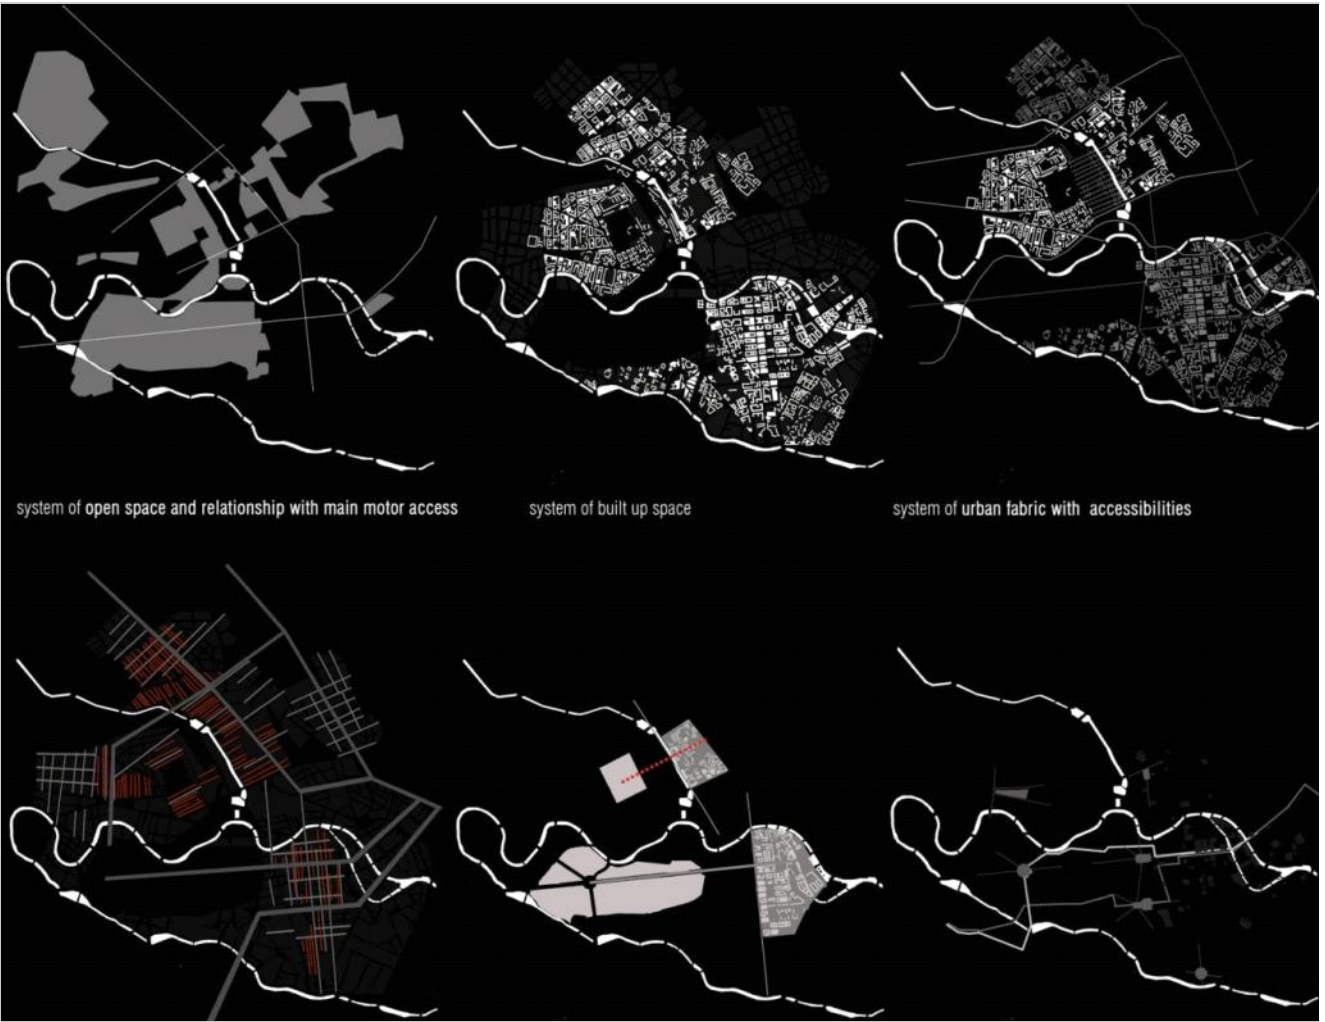

SYSTEM OF GREEN SPACE

SYSTEM OF RIVER

SYSTEM OF RELATIONSHIP

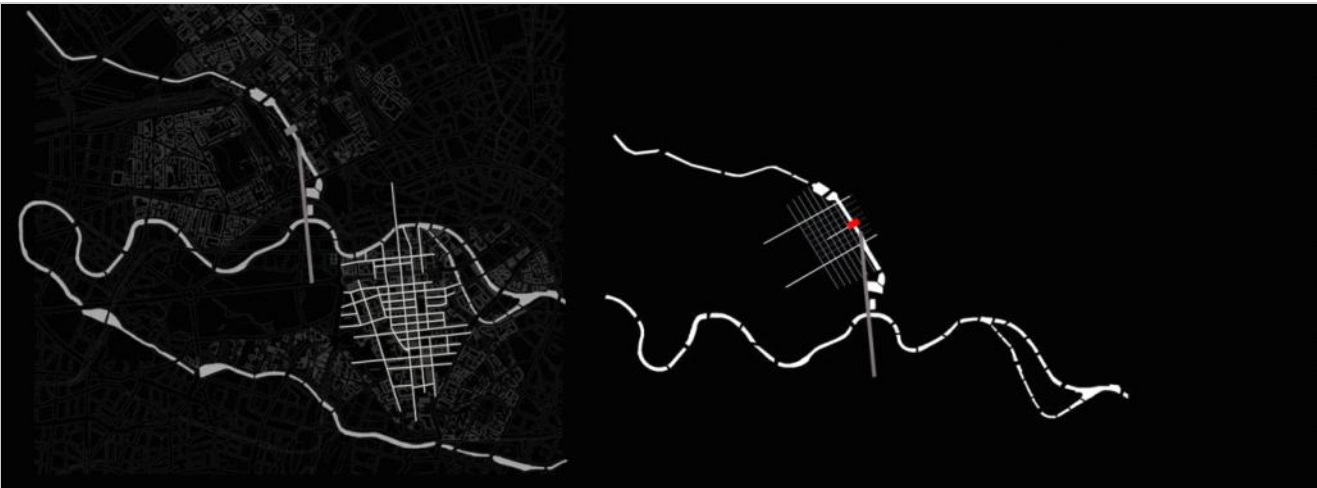

system of open space and relationship with main motor access

system of built up space

system of urban fabric with accessibilities

**ARCHITECTURE SPINE ;connect two gateways to project**  
 the importance of station for the project is related to its basic meaning of gateway the opening and since it is located in the middle way of the spine to serve the project.  
 this spine is most strong urban connection than others to show the importance of gate opening as project main entrance.

**URBAN CONNECTION ;through extending limits**  
 passing the river by bridges and give more accessibility to items like natural history museum which is one further attraction in Berlin and Berlin wall monument located in Invalidenpark and establish strong connection on top of project between two sport parks are main achievement of the project.

**HEART OF ARCHITETURAL SYSTEM ; urban plaza**  
 In the middle of the system a big square as public space to help much more social connection was designed this semi building with open floor to better view to surrounding in a attempt to way of more connectivity between to two sides of river where is closed because of natural barrier.

The Berlin Central Train Station, considered the biggest train station in Europe, opened March 28, 2006. This state-of-the-art station has countless conveniences for travelers including a suspension system for its platform, greatly reducing vibration and noise.

history

The Brandenburg Gate is considered

Natural History Museum is Established in 1810. It is the largest museum of natural history in Germany. It is famous for two spectacular exhibits: the largest mounted dinosaur in the world, and an exquisitely preserved specimen of the earliest known bird, Archaeopteryx.

The Invalidenpark is located in the district Mitte of Berlin. The park was established 1843 and completely redesigned from 1992 to 1997. In the middle of the park is a water basin which contains the granite sculpture "versteinerte Mauer" which translates to "fossilized wall". It commemorates the Berlin Wall which was located near this park.
