

TABLE OF CONTENTS

SUMMARY	ii
SOMMARIO	iv
ACKNOWLEDGEMENTS	v
TABLE OF CONTENTS	vi
LIST OF TABLES	x
LIST OF FIGURES	xiii
1. INTRODUCTION	1
1.1. Introduction of the context and previous researches	1
1.2. Defining the research problem and case studies	2
1.3. Introduction of research steps (objectives, methodology, scope and importance).....	3
2. HISTORICAL REFERENCE OUTLINE	5
2.1. Origins of the Ottomans	5
2.1.1. Frontier seigniory to empire	6
2.2. Ottoman art and building program in 14 th century	9
2.2.1. The architectural program in 14 th century	10
o Early period of Ottoman dwellings	14
o Building technology	14
o The differentiation of Ottoman architecture in Turkish seigniory period	15
2.3. Seigniory and early periods of Ottoman Empire	22
2.3.1. Seigniory period (1243-1483)	22
o The relations between Turkish tribes and Byzantine in Seigniory period	23
2.3.2. Early period of Ottoman Empire (1299-1505)	25
2.4. Overview of building traditions in Western Anatolia before the Turkish civilization.....	26
2.4.1. Byzantine architecture in Anatolia	28
2.4.2. Construction techniques in Anatolia before Turkish civilization.....	29
o Construction materials	29
o Masonry walls	30
o Transitional elements	37
o Closure structures.....	38
2.5. Construction techniques in Anatolia in after Turkish civilization	46
2.5.1. Turkish Seigniory period.....	46
o Masonry walls	46
o Transitional elements	51
o Closure structures.....	62
2.5.2. Early Ottoman period	73
o Masonry walls	73
o Transitional elements and the dome.....	74
2.5.3. Classical period of Ottoman	76
o Foundations.....	77
o Walls and wall pattern techniques.....	78
2.6. Categorization of types of building materials in Ottoman architecture	86
2.6.1. Stone.....	86
o Sedimentary Stones	86
o Magmatic stones	93
o Marbles.....	99
2.6.2. Brick and tiles	101

TABLE OF CONTENTS

2.6.3. Timber	103
o Oak	104
o Chestnut	105
o Beech Tree	105
o Ash Tree	105
o Elm Tree	105
o Poplar Tree	105
o Linden Tree	105
o Beech Tree	105
o Non - Resinous Pine Tree	105
o Resinous Pine Tree	105
o Walnut Tree	106
o Ceshew Tree	106
2.6.4. Iron, lead and bronze	106
2.6.5. Lime and 'Horosan' mortar	107
2.6.6. Used building materials in Turkish seigniory period in Western Anatolia	108
2.6.7. Used building materials in early period of Ottoman	108
3. BATHS AND TURKISH CULTURE	109
3.1. General qualifications of the Turkish bath	109
3.2. Turkish bath specifications	109
3.3. Turkish bath's parts and functions	109
3.3.1. Undressing, 'Soyunmalık'	109
3.3.2. Warmness, 'Ilıklık'	110
3.3.3. Hotness, 'Sıcaklık'	110
3.3.4. Burning room, 'Külhan'	110
3.4. Turkish bath Typology	111
3.5. Baths and their architectural qualifications	111
3.6. Cultural Habits and history of the bathing culture of Turkish people	112
4. METHODOLOGIES	114
4.1. Definition of the qualitative methodology for defining the masonry walls of bath structures (Methodological application A)	114
4.1.1. Parameters of the rule of methodology	114
o The quality of mortar, effective contact between elements – (QM)	115
o Presence of cross diatone-meshing - (PD)	115
o Form of the element that was resisted – (F.R.E.)	116
o Size of resistant elements - (S.R.E.)	116
o Stagger the vertical joints between the meshing in the plan - (S.V.J.)	116
o Presence of horizontal rows – (P.H.R.)	116
o Quality resistant elements – (Q.R.E.)	117
4.1.2. Determination of the scores and their contribution to the masonry wall categories	117
4.1.3. Method of scoring of the parameters	117
4.1.4. Loads that affect the masonry wall structure	118
o Vertical Loads	119
o Horizontal out of plane actions	119
o Horizontal plane actions	120
4.1.5. Scores and calculations	121
4.2. Definition of damage and collapse analysis method (Methodological application B)	125
4.2.1. Analysis of the Quality of Walls	127

TABLE OF CONTENTS

4.2.2.Introductory points for “the rule of art”	127
o Interpretation of quality through the cracks of the walls	129
o Peculiarities of the masonry walls.....	129
4.2.3.Steps that have to considered for the “the rule of art”	130
o Vertical loads	130
o Horizontal loads out of plane action	133
o Horizontal loads in plane action.....	138
4.2.4.Crack and damage behavior of the angled masonry walls	142
4.2.5.Crack and damage behavior of masonry cells.....	143
o Behavior of the masonry cell	143
o Deformation of the cell walls	144
o Rigid cell walls with horizontal fixing elements.....	144
o Masonry cell closures.....	145
4.2.6.Behavior of mass: “The buildings in a row”	146
o Mode of growth of the masonry cells	147
o Transversal actions.....	147
o Front cell masonry wall.....	150
o Non-aligned masonry cells.....	150
4.2.7.Damage and material analysis with graphics and descriptions	152
o Damage mechanism of the masonry walls (General collapse facts about the masonry structures)	154
o Cracks, damages of the masonry structures and their identification	159
o Interpretative analysis and critique of masonry construction.....	164
o Method of the kinematic mechanism of collapse.....	164
o Failure mechanisms of different structural elements in buildings	170
4.2.8.Analysis of case study bath structures.....	173
5. EARTHQUAKES IN ANATOLIA	174
5.1. Case study regions in Anatolia.....	174
5.1.1. znik region	176
o Historical earthquakes in znik.....	176
5.1.2. Bilecik region	178
5.1.3. Edirne region.....	179
5.2. Past Earthquakes	179
5.2.1.Historical earthquakes in Marmara region	181
5.3. Geological specifications of the case study locations	187
5.3.1. znik settlement	187
5.3.2. Bilecik city	187
5.3.3. Ke an settlement	188
5.3.4. Edirne city	188
5.3.5. Havsa settlement	188
5.4. The earthquake shaking potencial for Marmara region	188
6. CITIES AND LOCATIONS	191
6.1. znik “Nicaea” City.....	191
6.1.1. History.....	193
o znik “Nicaea” in the Hellenistic and Roman Periods	193
o Byzantine Period	194
o Ottoman Period	197

TABLE OF CONTENTS

6.1.2. Architectural values.....	198
o Hellenistic and Byzantine Period.....	199
o Ottoman Period.....	204
6.2. Bilecik “Belekoma” City.....	210
6.2.1. History.....	213
6.2.2. Architectural values.....	214
o “Kulaklı ta ” tomb.....	214
o One of the gate of the castle in Bilecik.....	214
o “Osman Camii” mosque.....	214
o “Orhan Gazi Camii” mosque.....	215
o “Süleymanpa a Camii” mosque.....	216
o “ eyh Edebali” masjid.....	216
o “Malhatun” tomb.....	216
o “ eyh Edebali” tomb.....	216
o “Orhan Gazi” maret.....	217
o “Süleyman Pa a” bath.....	217
o “Emirler” bath.....	218
o “Tabakhane” bath.....	218
6.3. Edirne “Hadrianopolis” city.....	219
6.3.1. History.....	226
6.3.2. Architectural values.....	227
o Byzantine period and the cultural items that are coming from this time.....	227
o Turkish architecture in Edirne and its development.....	229
7. CASE STUDIES.....	236
7.1. Emirler Bath.....	236
7.1.1.Methodological application (A).....	239
7.2. Süleymanpa a Bath.....	242
7.2.1.Methodological applications (A).....	245
7.2.2.Methodological applications (B).....	248
7.3. smail Bey Bath.....	255
7.3.1.Methodological applications (A).....	257
7.3.2.Methodological applications (B).....	260
7.4. Beylerbeyi Bath.....	268
7.4.1.Methodological applications (A).....	270
7.5. Gazi Mihal Bey Bath.....	273
7.5.1.Methodological applications (A).....	276
7.5.2.Methodological applications (B).....	279
7.6. Havsa Sokullu Bath.....	292
7.6.1.Methodological applications (A).....	295
7.7. Ke an Bath.....	298
7.7.1.Methodological applications (A).....	300
7.7.2.Methodological applications (B).....	303
7.8. Yeniçeri Bath.....	312
7.8.1.Methodological applications (A).....	314
8. CONCLUSION.....	317
REFERENCES.....	322
APPENDIX.....	334
