## LIST OF FIGURES

### Chapter 3: Baths and Turkish Culture

Fig 3.1: The heating and water system in Turkish baths (Original: Klinghardt, 1927); (Citation: Say, 2011).....	110
Fig 3.2: “Filgözü – lantern” details used in domes of the baths (Original: Klinghardt, 1927); (Citation: Say, 2011).....	112

### Chapter 4: Methodologies

Fig 4.1: Vertical action (Borri, 2011).....	119
Fig 4.2: Vertical action on section of the masonry wall (Borri, 2011).....	119
Fig 4.3: Out of plane action (Borri, 2011).....	120
Fig 4.4: In plane action (Borri, 2011).....	120
Fig 4.5: Section of wall hangings of stones with uneven dimensions (Borri, 2011).....	130
Fig 4.6: Detail of the meshing of the stones and the effect of removal crushing (Borri, 2011).....	130
Fig 4.7: Effect pushing the spread between the compressive stresses on inclined surfaces (Borri, 2011).....	130
Fig 4.8: Equilibrating forces in the wall hangings with meshed (Borri, 2011).....	131
Fig 4.9: Forces balancing in the presence of non-meshed leaves of the masonry: masonry internally pushing (Borri, 2011).....	131
Fig 4.10: Expulsion leaves of walls (Borri, 2011).....	131
Fig 4.11: Phenomenon expulsion of the external (Borri, 2011).....	131
Fig 4.12: Mesh of the leaves masonry and their behavior under the applied forces (Borri, 2011).....	132
Fig 4.13: Mesh of the leaves masonry and their behavior under the applied forces (Borri, 2011).....	132
Fig 4.14: Staggering vertical joints (Borri, 2011).....	133
Fig 4.15: The differences of the spreading of the vertical loads according to the different size texture of the blocks (Borri, 2011).....	133
Fig 4.16: A typical mode of failure for masonry types C (Borri, 2011).....	133
Fig 4.17: Scheme for overturning a monolithic wall (Borri, 2011).....	134
Fig 4.18: Scheme for overturning a monolithic wall with two leaves (Borri, 2011).....	134
Fig 4.19: Presence and not presence of diatones in two different example of masonry wall (Borri, 2011).....	134
Fig 4.20: Masonry wall category according to the materials (Borri, 2011).....	134
Fig 4.21: Compressive and bending stresses that are applied to masonry wall (Masonry walls with category A) (Borri, 2011).....	135
Fig 4.22: Compressive and bending stresses that are applied to masonry wall (Masonry walls with category B) (Borri, 2011).....	135
Fig 4.23: Lack of diatones inside of the masonry (Borri, 2011).....	135
Fig 4.24: “C” coefficient for masonry walls and monolithic walls (Borri, 2011).....	135
Fig 4.25: Example of overturning double leaf walls (Borri, 2011).....	135
Fig 4.26: Overturning of a wall with the percentage of loose fill (Borri, 2011).....	136
Fig 4.27: Presence of horizontal planes of arrangement allows the occurrence of kinematic mechanisms of the walls (wall "chaotic" and wall in perfectly regular rows with masonry) (Borri, 2011).....	136
Fig 4.28: Effect of arch masonry (Borri, 2011).....	137
Fig 4.29: Influence of voids on failure mechanisms: the case of a chimney illustrated in a diagram (Borri, 2011).....	137
Fig 4.30: Response of masonry walls hit by seismic orthogonal (Borri, 2011).....	138

## LIST OF FIGURES

Fig 4.31: Contributions for the resistant to the actions ( <i>Borri, 2011</i> ).....	138
Fig 4.32: Resistant forces inside of the masonry, rotation of the wedge A ( <i>Borri, 2011</i> ).....	139
Fig 4.33: Resistant forces inside of the masonry, rotation of the wedge B ( <i>Borri, 2011</i> ).....	139
Fig 4.34: Resistant forces inside of the masonry, rotation of the wedge C ( <i>Borri, 2011</i> ).....	139
Fig 4.35: Effect "chain" of masonry wall ( <i>Borri, 2011</i> ).....	139
Fig 4.36: Absence of sliding resistance in masonry walls with joints aligned in at least a vertical section ( <i>Borri, 2011</i> ).....	139
Fig 4.37: Masonry cracks caused by actions coplanar with the wall ( <i>Borri, 2011</i> ).....	140
Fig 4.38: Masonry example of masonry cracks by actions coplanar with the wall ( <i>Borri, 2011</i> ).....	140
Fig 4.39: The critical angle between the bricks of masonry ( <i>Borri, 2011</i> ).....	141
Fig 4.40: The critical angle between the stones of masonry ( <i>Borri, 2011</i> ).....	141
Fig 4.41: Three type of patterned brick masonry wall that have different resistance to in plane actions ( <i>Borri, 2011</i> ).....	141
Fig 4.42: Typology of brick masonry pattern and crack analysis ( <i>Borri, 2011</i> ).....	142
Fig 4.43: Mechanism of damage without connections on corner of masonry wall ( <i>Borri, 2011</i> ).....	142
Fig 4.44: Mechanism of diagonal damage ( <i>Borri, 2011</i> ).....	142
Fig 4.45: Collapse mechanism with formation of an intermediate diagonal hinge ( <i>Borri, 2011</i> ).....	143
Fig 4.46: Mechanism of damage with well-connected and crack start from diagonal the wall ( <i>Borri, 2011</i> ).....	143
Fig 4.47: Mechanism of bending failure and side effects, plan and elevation ( <i>Borri, 2011</i> ).....	144
Fig 4.48: Failure mechanism of masonry wall structures with the attachment of concrete or iron chains ( <i>Borri, 2011</i> ).....	144
Fig 4.49: Mechanism of wall damage retained in the attic ( <i>Borri, 2011</i> ).....	145
Fig 4.50: Folding mechanism amplified by the thrust distribution of the barrel vault ( <i>Borri, 2011</i> )..	145
Fig 4.51: Mechanism of rupture in bending out of the plane, amplified by the central thrust of the segment ( <i>Borri, 2011</i> ).....	146
Fig 4.52: Evolution of the mechanism of damage resulting from the collapse of the central segment ( <i>Borri, 2011</i> ).....	146
Fig 4.53: Mechanism of breaking or bending of the vault by out of plane action ( <i>Borri, 2011</i> ).....	146
Fig 4.54: Search of structural collaboration between cell walls arranged on one and two levels with arches and iron chains ( <i>Borri, 2011</i> ).....	147
Fig 4.55: Mechanisms of growth of the historical location of the cells in the context of neighboring buildings, A ( <i>Borri, 2011</i> ).....	148
Fig 4.56: Mechanisms of growth of the historical location of the cells in the context of neighboring buildings, B ( <i>Borri, 2011</i> ).....	148
Fig 4.57: Example of tilting mechanisms of facade walls which are not bound to the main structure ( <i>Borri, 2011</i> ).....	148
Fig 4.58: Failure mechanism of a masonry wall ( <i>Borri, 2011</i> ).....	149
Fig 4.59: State of deformation induced by seismic action on the longitudinal masonry walls coplanar with cellular row building ( <i>Borri, 2011</i> ).....	149
Fig 4.60: Central cells of a block row: law enforcement efforts ensured by the adjacent buildings ( <i>Borri, 2011</i> ).....	149
Fig 4.61: Central cells of a block row: diffusion pattern of seismic actions ( <i>Borri, 2011</i> ).....	149
Fig 4.62: Kinematic rotation of the masonry wall ( <i>Borri, 2011</i> ).....	150
Fig 4.63: left; masonry cell collapse mechanism of the top, right; traction of devices to the head of the masonry cell ( <i>Borri, 2011</i> ).....	150

## LIST OF FIGURES

Fig 4.64: Case statement is not in line with neighboring cells and cracks parts, second figure case statement with free end cell break up from the top of the building (Borri, 2011).....	151
Fig 4.65: Stable area which is shown under the arcade of the critical line (Borri, 2011).....	151
Fig 4.66: Support produced by the stabilizing elements in the row of blocks (Borri, 2011).....	151
Fig 4.67: Curve of the pressures in the configuration of minimum thrust (b) and maximum (a) in an arch (Heyman, 1995).....	171
Fig 4.68: The four mechanisms of collapse connections due to “Coulomb” (Borri, 2011).....	171
Fig 4.69: Type of collapse mechanisms of arch (Borri, 2011).....	171
Fig 4.70: Four hinge mechanisms of collapse for the triumphal arch (Borri, 2011).....	172
Fig 4.71: Schematic of the decomposition of the elementary pavilion vault arches (Borri, 2011).....	173
Fig 4.72: Schematic of the decomposition of the dome: distribution of the forces along the meridians of a dome, decomposition of the dome into segments, each of which is calculated as a semi-arch (Borri, 2011).....	173
Fig 4.73: Icon for the ratio of the risks of the structural units.....	173
 Chapter 5: Earthquakes in Anatolia	
Fig 5.1: Tectonic outline of Turkey and eastern Mediterranean area. DFZ: Dead sea Fault Zone, EAFZ: East Anatolian Fault Zone, NAFZ: North Anatolian Fault Zone (Modified from: Dewey and Engör, 1979); (Citation: Gürer, Ö., F., Kaymakçı, N., Çakır, ., Özburan, M., 2003).....	174
Fig 5.2: Major neotectonic structures in the Marmara region. MF: Mürefte Fault, GB: Geyve Basin, LM: Lake Manyas, LA: Lake Apolyont (Gürer, Ö., F., Kaymakçı, N., Çakır, ., Özburan, M., 2003).....	175
Fig 5.3: Seismic Regions of the Turkey (red; most risky / white; less risky) and the location of the case studies; Edirne, Ke an, znik, Bilecik (Turkey’.T.C. Basbakanlik Afet ve Acil Durum Yönetimi, Deprem Dairesi Başkanlı ı).....	175
Fig 5.4: Seismic map of Edirne, Ke an, znik, Bilecik (Turkey’.T.C. Basbakanlik Afet ve Acil Durum Yönetimi Başkanlı ı, Deprem Dairesi Başkanlı ı).....	176
Fig 5.5: Tectonic map of the znik basin (Öztürk, Yaltırak, Alpar, 2008).....	176
Fig 5.6: Traces of offset in historical walls surrounding znik (south wall) (Adatepe, Erel 2006).....	178
Fig 5.7: Morphotectonic units of the Marmara region, [red; Bilecik city, blue; znik city, green; stanbul city (Emre, Erkal, Tchepalyga, Kazancı, Keçer, Ünay, 1998).....	179
Fig 5.8: Historical earthquakes (red points) and recent earthquakes of Turkey (white points) and the location of the case studies (Tan, Tapırdamaz, Yörüük, 1998).....	179
Fig 5.9; Earthquake occurrences in the Marmara region which derived from the data’s of paleoseismological studies (Utkucu, M., Budako lu, E., Durmu , H., 2011).....	180
Fig 5.10: Long-term seismicity of the Marmara region, seismicity between 32 AD-1983 taken from Ambraseys (Erdik, M., Demircio lu, M., Sesetyan, K., Durukal, E., Siyahi, B., 2004)....	180
Fig 5.11: Location map of the earthquake of 10 <sup>th</sup> September 1509. Circle was shown the epicentral area with associated intensities of VII (Ambraseys, Finkel).....	182
Fig 5.12: The map of stanbul in 16 <sup>th</sup> century and the location of the damaged buildings after the earthquake 10 <sup>th</sup> September 1509 (Ambraseys, Finkel).....	183
Fig 5.13: Woodcut by Peter Coecke (1529) of mosque of Sultan Mehmet II, without minarets and damaged on its dome structure (Ambraseys, Finkel).....	183
Fig 5.14: Fatih mosque complex from a mid-sixteenth century engraving by M. Lorichs (Ambraseys, Finkel).....	184

## LIST OF FIGURES

Fig 5.15: Marmara region seismic magnitudes in last century: Grey color: 7.0-8.0, Brown color: 6.0-7.0, Red: 5.0-6.0, Green: 4.7-5.0, Aqua: 4.7 ( <i>Turkey'.T.C. Basbakanlik Afet ve Acil Durum Yönetimi Başkanlığı, Deprem Dairesi Başkanlığı</i> ).....	184
Fig 5.16: Geological Map of Marmara region-Turkey and the location of the case studies ( <i>The Geological Map of Turkey, 2002</i> ).....	187
Fig 5.17: Geological Map of İznik settlement ( <i>The Geological Map of Turkey, 2002</i> ).....	187
Fig 5.18: Geological Map of Bilecik city ( <i>The Geological Map of Turkey, 2002</i> ).....	187
Fig 5.19: Geological Map of Keleşan settlement ( <i>The Geological Map of Turkey, 2002</i> ).....	188
Fig 5.20: Geological Map of Edirne city ( <i>The Geological Map of Turkey, 2002</i> ).....	188
Fig 5.21: Geological Map of Havsa settlement ( <i>The Geological Map of Turkey, 2002</i> ).....	188
Fig 5.22: The map of surface geological materials in Marmara; the colors identifies the surface shear velocity (m/s) of upper 30 meters; green color identifies 0-150(m/s) and the red color identifies 700-800(m/s) ( <i>Kalkan, Gülkan, Yılmaz, Tüysüz, Sevilgen, 2010</i> ).....	189
Fig 5.23: Map of low frequency shaking potential in Marmara ( <i>Kalkan, Gülkan, Yılmaz, Tüysüz, Sevilgen, 2010</i> ).....	189
Fig 5.24: Map of high frequency shaking potential ( <i>Kalkan, Gülkan, Yılmaz, Tüysüz, Sevilgen, 2010</i> ).....	190

## Chapter 6: Cities and Locations

Fig 6.1: The map of İznik and the location of Smail Bey bath (yellow point) ( <i>Municipality of İznik, 2013</i> ).....	191
Fig 6.2: The map of İznik shows the places of important architectural structures and the excavated kilns ( <i>Lowry, H., W. 2003</i> ).....	192
Fig 6.3: Arial photograph of İznik taken by Barnier in 1913 ( <i>Lowry, H., W. 2003</i> ).....	193
Fig 6.4: The Tower of the city wall of İznik ( <i>Angold, 2003</i> ).....	199
Fig 6.5: The Gate of Lefke: Gates from the Roman and Byzantium periods (the one in the middle is from the Roman period) ( <i>Ahın, 2003</i> ).....	200
Fig 6.6: The Gate of İstanbul ( <i>Ahın, 2003</i> ).....	200
Fig 6.7: The Gate of Yenişehir ( <i>Ahın, 2003</i> ).....	201
Fig 6.8: The Obelisk of Gaius Cassius Philiscus ( <i>Modified from: Merkelbach, 1987</i> ); ( <i>Citation: Abbaso lu-Delemen, 2003</i> ).....	202
Fig 6.9: The obelisk of Gaius Cassius Philiscus ( <i>Modified from: Schneider, 1943</i> ); ( <i>Citation: Abbaso lu-Delemen, 2003</i> ).....	202
Fig 6.10: H.Sophia Church from south ( <i>Peschlow, 2003</i> ).....	203
Fig 6.11: Koimesis Church from southeast ( <i>Modified from: Schmit pl. II</i> ); ( <i>Citation: Peschlow, 2003</i> ).....	203
Fig 6.12: The plan of the İznik Hacı Hamza Mosque ( <i>Aslanapa, 2003</i> ).....	206
Fig 6.13: The Yeşil Mosque ( <i>Aslanapa, 2003</i> ).....	206
Fig 6.14: The Hospice of Nilüfer Hatun in İznik ( <i>Aslanapa, 2003</i> ).....	207
Fig 6.15: The Madrasa of Süleyman Paşa ( <i>Aslanapa, 2003</i> ).....	207
Fig 6.16: The Tomb of Hacı Hamza and Kirghiz ( <i>Aslanapa, 2003</i> ).....	208
Fig 6.17: I. Murat bath in İznik ( <i>Say, 2011</i> ).....	208
Fig 6.18: II Murat bath in İznik ( <i>Say, 2011</i> ).....	209
Fig 6.19: Smail Bey bath in İznik.....	209
Fig 6.20: Bilecik city ( <i>Google maps, 2014</i> ).....	210
Fig 6.21: Bilecik city focus on Seydi Edebali tomb, Süleymanpaşa bath (red point) and Emirler bath (yellow point). ( <i>Google maps, 2014</i> ).....	210

## LIST OF FIGURES

Fig 6.22: The historical map of Bilecik (Özcan,, Sarıay, 2012).....	211
Fig 6.23: Hüdevendigar vilayeti, Erturul Sanca 1 hand drawn map in 1885, scale: 1/500.000 (Historical names of Bilecik City in Ottoman Empire) (Özcan,, Sarıay, 2012).....	211
Fig 6.24: The historical photo I of Bilecik in 1882-1905 (Bilecik Museum, 2013).....	212
Fig 6.25: The historical photo II of Bilecik in 1882-1905 (Bilecik Museum, 2013) .....	212
Fig 6.26: “Kulaklı ta ” tomb (Güney, 1938) .....	214
Fig 6.27: One of the gate of the castle in Bilecik, 8 Sep. 1892 (Özcan, Sarıay, 2012).....	214
Fig 6.28: The castle of Bilecik and Orhan Mosque, (1882) (Ayverdi, 1989).....	215
Fig 6.29: Transitional elements of Orhan Mosque (Ayverdi, 1989).....	215
Fig 6.30: eyh Edebali and Mal Hatun tombs in Bilecik (Ayverdi, 1989).....	216
Fig 6.31: Orhan Imaret in Bilecik (Ayverdi, 1989).....	217
Fig 6.32: The entrance gate of Orhan Imaret (Ayverdi, 1989) .....	217
Fig 6.33: Süleymanpa a bath (Mülayim, Öztürk, 2011).....	217
Fig 6.34: Emirler bath .....	218
Fig 6.35: Edirne “Hadrianopolis” city map; Mosques, Churches and cemeteries were shown on this map (Osman, 1920) .....	219
Fig 6.36: Edirne city map; (war plan map) end of XIX century (Darkot, 1993).....	220
