Strategy for design

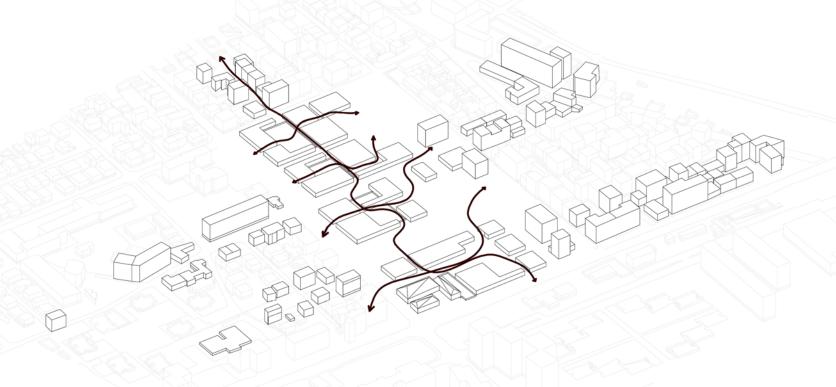

[Second floor]
The squares building platforms are creating small inner courts that firstly serve to the residents of the project area then to the surrounding residents.
The inside courts are lower from the street lever for 1,5 meter.

[First floor]
Emphasizing the stronger axes trough the plot and making important connection with the surrounding.
The surrounding area can benefit of the public spaces and diverce activities from the masterplan.

[Ground floor]
Dynamic and complex space from the the city continues inside the plot.
Masterplan offers multiple ways in relation with the surroinding and offering rich program of activities.
